Why Donor Milk To Go?

- Newborn nurseries want to use donor milk for supplementation due to delayed lactation.
- Families of healthy term babies want to be discharged with donor milk for supplementation when lactation is delayed.

Program Goal

- Goal: To provide a safe feeding transition for newborns that would support mothers in their own breastfeeding or exclusive human milk feeding goals.
- Year 1 Objective: Establish DMTG distribution sites in 1 Tarrant County and 2 Dallas County hospitals in the first year (2018).
- Year 1 Accomplishments:
 - Established 2 Tarrant County and 3 Dallas County distribution sites.
 - Hospitals have been very receptive of DMTG and interest in expansion is high.

Equity

- Vision Statement: MMBNT envisions a future when all babies will have the opportunity to receive human milk.
- Reduced cost of milk from \$14.65 to \$10 per 100mL bottle.
- Equity of DMTG program will be a focus of MMBNT's new strategic planning cycle, which started this month.
- Goal: to make milk more affordable for healthy babies who don't qualify for medical necessity, but do qualify for WIC.

Program Development

- Memorandum of Understanding with each distribution site
- Recipient application on Luxsci, a secure, HIPAA-compliant database
- Digital payment system for convenience

The screenshot shows the website for the Mothers' Milk Bank of North Texas. The header includes social media icons, a language toggle for "EN ESPAÑOL", and buttons for "Donate Milk" and "Donate Money". The main navigation bar contains links for "About Us", "Milk Banking", "Donate", "Healthcare Providers", "Receive Milk", and "Resources".

Presbyterian Dallas Distribution Site

Donor Milk To Go

The Donor Milk To Go program allows parents of healthy newborns to supplement with human milk instead of formula, providing babies with a healthy start and parents with peace of mind. Based on availability and a physician's prescription, the program bridges the gap between leaving the hospital and a successful breastfeeding routine.

This program is only available at participating Donor Milk To Go hospitals. To receive your milk, follow the steps below:

1. Obtain a prescription from a physician.
2. [Click here to complete the Donor Milk To Go recipient paperwork.](#)
3. Pay for your order here:

200 ml bottles:	100 ml bottles:

Donor Milk To Go

Donor Milk To Go allows parents of healthy newborns to supplement with human milk instead of formula, providing babies with a healthy start and parents with peace of mind. Based on availability and a physician's prescription, the program bridges the gap between leaving the hospital and a successful breastfeeding routine.

About Us

- Mothers' Milk Bank of North Texas is dedicated to improving the health and survival of infants through the safe provision of pasteurized donor human milk. MMBNT is a 501(c)3 nonprofit organization and has served North Texas and beyond since 2004.
- Donor milk is processed, tested and gently pasteurized to ensure safety.
- The majority of donor milk is processed for critically ill and premature infants. However, based on availability, a portion of milk can serve healthy newborns.

Who Donates the Milk?

- Screened, approved mothers who produce breastmilk in excess of their own babies' needs.
- Screening includes a phone interview, medical release and blood testing.
- Donors are not compensated for donations.

How to Get Your Donor Milk To Go

Please check availability at your distribution site before ordering.

1. Obtain a prescription for donor human milk from your baby's doctor.
2. Visit www.texasmilkbank.org.
3. Click "Receive Milk", then select "Donor Milk To Go".
4. Click on the pink link to complete required paperwork.
5. Attach your prescription to the paperwork by either taking a picture of the prescription with your phone, or scanning in the prescription from a computer.
6. Show proof of paperwork completion to hospital staff. A screenshot of your success page is sufficient.
7. Navigate back to the Donor Milk To Go page. Select your distribution site, then enter the password provided.
8. Select quantity of bottles. Click "Buy Now" and enter payment information. You will receive a receipt by email.
9. Show your emailed receipt to hospital staff to receive milk. You must have proof of both payment and paperwork completion in order to receive milk. Call MMBNT with any questions.

To order more milk, contact MMBNT at 817-810-0071 for assistance.
Office hours: Monday-Friday, 9:00 am to 4:30 pm

COST

100 mL bottles have a processing fee of **\$10**, while 200 mL bottles have a processing fee of **\$20**. Because milk is donated, families are not charged for the milk itself. Cost is based on expenses associated with safety, including screening, pasteurization, testing and packaging.

1	020713-1		Baby name: Baby DOB: Parents name:	
2	020713-1		Baby name: Baby DOB: Parents name:	
3	020713-1		Baby name: Baby DOB: Parents name:	
4	020713-1		Baby name: Baby DOB: Parents name:	
5	020713-1		Baby name: Baby DOB: Parents name:	
6	020713-1		Baby name: Baby DOB: Parents name:	
7	020713-1		Baby name: Baby DOB:	

Program Implementation

- Began with one pilot hospital in Fort Worth.
- MMBNT trained hospital staff and was on-call for the first few uses of the program.
- MMBNT provided the freezer and storage equipment.

Program Improvements

- More frequent training for hospital staff.
- Individualize login for each distribution site so we can customize options.
- Limit orders to minimal amount of batches.
- Improve tracking efficiency.

“This has been a wonderful option for our family. It has been a very convenient and simple process, and overall it is helping my baby girl and wife.”

- RAHAM TRUJILLO, DMTG
recipient father

- Distribution sites' top concern is the continued availability of milk.
- Staff at distribution sites are working to educate their communities and fellow staff about the importance of donor human milk.
